

EILOR MAGNETIC CORES

We keep it **GREEN**

We keep it **CLEAN**

ABOUT US

EILOR MAGNETIC CORES was established over 50 years ago and specializes in the manufacture of tape wound magnetic cores, both cut and uncut.

OUR PRODUCTS

As a specialist in magnetic cores, we offer a wide range of products, providing our customers with production means for high efficient transformers and inductors in various shapes and sizes according to customer's specifications.

PRODUCTS CATEGORIES

C-CORES

Single phase wound cut cores

TOROIDS

Round tape wound cores

E-CORES

Three phase wound cut cores

SPECIAL CORES

special size & shape requirements

MATERIALS

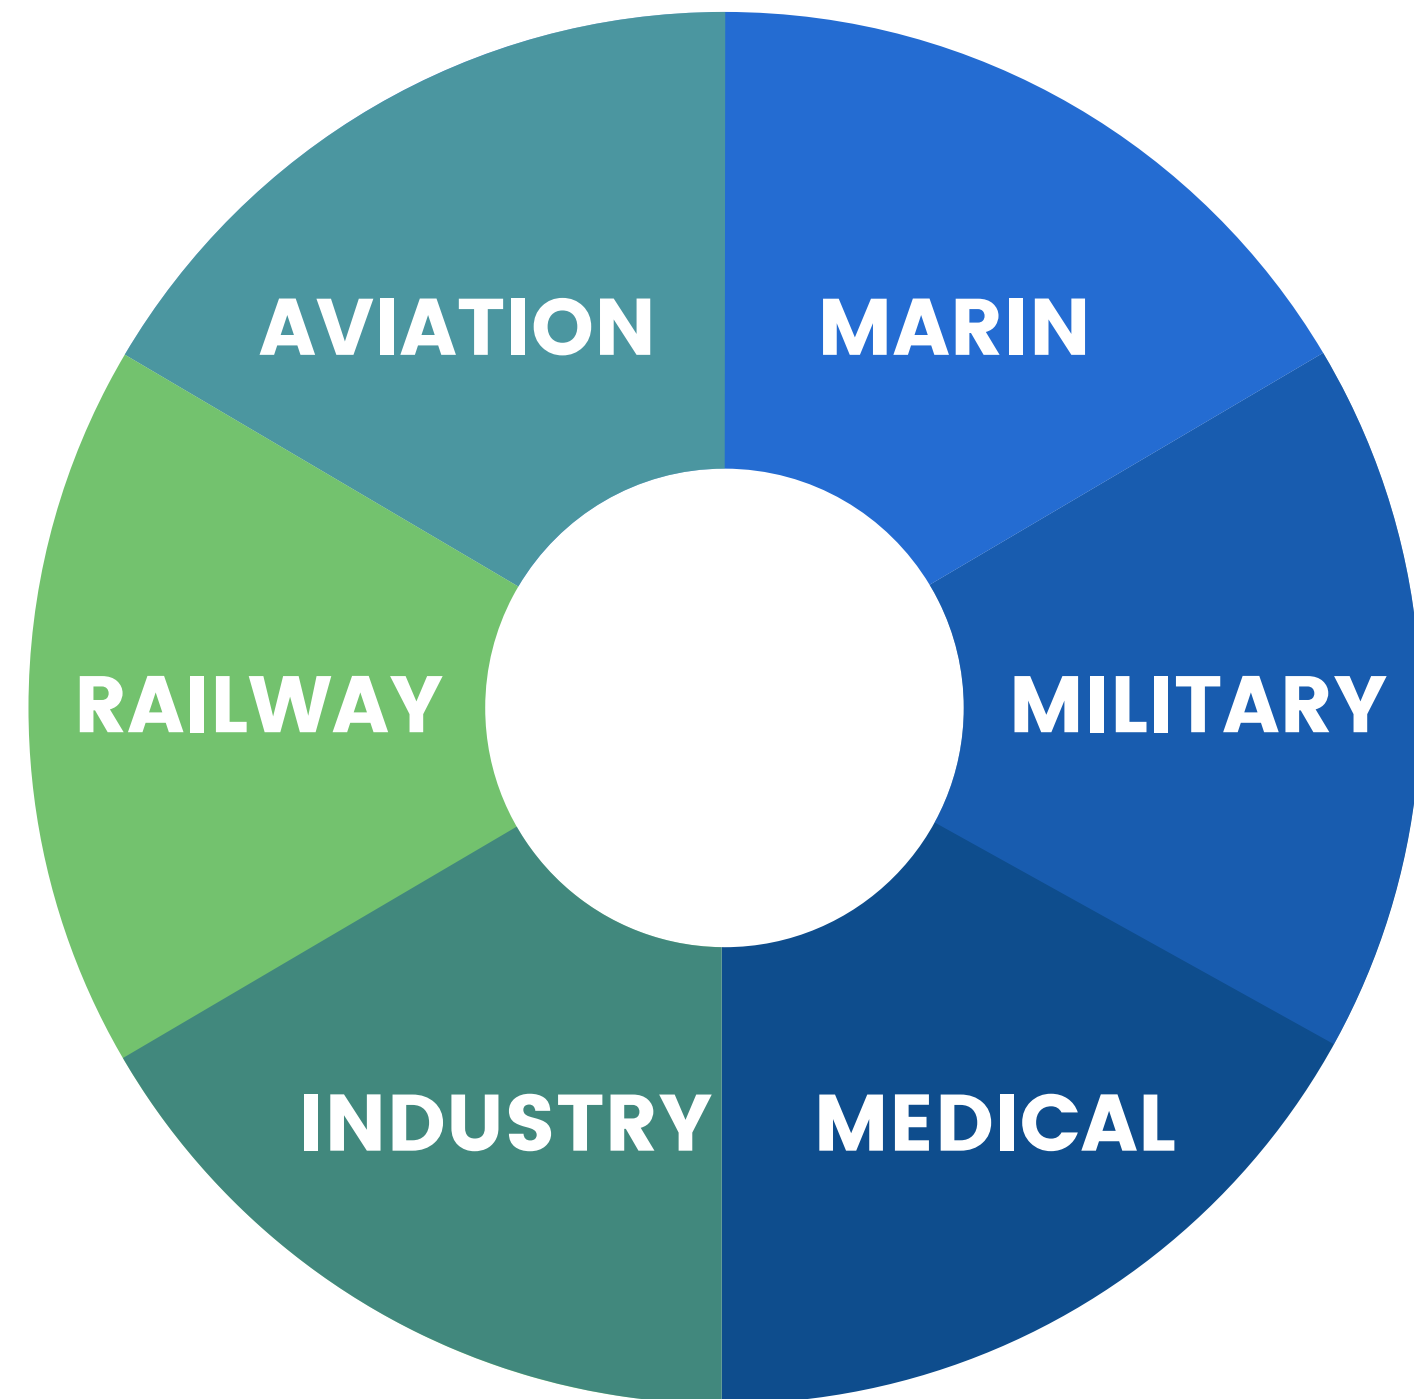

The following materials are used in EILOR'S production:

- Grain Oriented Silicon Steel – 0.05mm to 0.3 mm thickness, all types of HiB and regular.
- Nickel Alloys – 0.025mm to 0.3 mm thickness, in various Nickel composition (49%–80%).
- Cobalt Alloy
- Amorphous & Nanocrystalline ribbon

END USERS AND APPLICATIONS

EILOR cores are used in a wide range of applications in Power & Current Transformers, Reactors, Inductors and more.

QUALITY MANAGEMENT

EILOR complies to meet the requirements of the **AS 9100D** with **ISO 9001:2015** standards and maintains the quality management system according to it.

Quality management is an integral part of the organization's culture in all its fields of activity, including:

- Optimizing the work while planning.
- Controlling.
- Corrective action for continuous improvement.
- Quality assurance.

All while providing the highest level of service
and maintaining the satisfaction
of our customers in all aspects.
